

POP UPRIGHT PIANO

SOUND EXPANSION

Pop Upright Piano by Midipirates

With great love to detail we sampled a wonderful
Yamaha LU201c Upright Piano.

To be honest, it's a beast.

It's the loudest and most brilliant Upright Piano we have heard so far, what makes it so powerful for use in Pop Music, playing and production. With a special combination of close and room microphone technique we achieved a recording that unifies the character of an Upright with the full body and brilliance of a Grand Piano.

With 300 MB of Samples and 16 Voices it is still reasonably sized for your Flash-Memory equipped Synth and will give you plenty of fun on stage or in the studio.

We hope you enjoy our Midipirates Pop Upright Piano!
